NOTE: You ARE permitted to pass this short report on. However, you are not permitted to charge for the report OR ask for anyone's email address in return. Just give it to your website visitors! YOU ARE NOT PERMITTED TO EDIT THE REPORT IN ANY WAY.

Introduction

This very short report is aimed at the absolute beginner. Those of you who are desperately searching for a way to make money online. The following method works, even if you have never been involved with marketing online before. It doesn't require any investment, and can start making money within a few days.

I make no guarantee of your success. Only you can determine how successful you are! Read this report, then take action.

This report is deliberately short as I am simply sharing the absolute basics with you.

Step 1 – Setting Up Your FREE Blog

Ok, straight into step 1. You need a blog. Why? A blog (or weblog) is the quickest and easiest way to get a 'website' online immediately. Personally I recommend [Wordpress](#) for this as the search engines seem to prefer it. Go to [Wordpress](#) now and set up your free account.....

Ok....

You need to pick a subject that you already have knowledge of. I could go into researching niches and picking one that will be the biggest money maker. But we are trying to get you making money as quickly as possible right? I could get into keyword research and the rest of it, but truthfully, this will probably be a bit over your head at the moment.

Name your blog using keywords related to your subject as this will form part your blog url (address). For example, if your blog is going to be on dog training, then use dog training in your title. This will ensure search engines and your blog visitors alike know what your blog is about!

Once you have set up your blog and played around with presentation etc, then you are ready for the next step.....

Step 2 – Register With Clickbank

If you are not a member already, then register for your FREE [Clickbank](#) account now.

What is [Clickbank](#)?

It is simply a database of thousands of digital products sold online. I'm not going to go into too much detail here, but it allows you to promote these digital products to others. When someone orders a product and makes payment, you will receive anything from 25-75% of the sale. This is what's known as Affiliate Marketing, and is the quickest way to start making money on the Internet.

Once you have your account set up, simply search for products to promote that are related to your blog subject. You should have no problem with this as the products available are pretty varied. However, in the event that you can't find anything, simply type *YourBlogSubject + affiliate* programs into Google and you should have a long list of possible products or services to promote. If you still have problems finding something, then it's probably best at this point to chose a different subject for your blog. Simply go back to your Wordpress account and register another blog title.

As mentioned earlier, I could go into keyword research and other techniques for finding a profitable niche, but the rule of thumb is if you can't find any affiliate products to promote for your chosen

subject then you probably need to think of something else!

Step 3 – Start Blogging And Promoting

Step 3 is nice and simple. Still nothing technical here! Simply start blogging!

I mentioned earlier that you should choose a subject that you are familiar with and/or have an interest in. The reason I said that is simple – you are going to be writing daily articles/posts on this subject. To make money in the quickest possible time, then you need to;

1. Have knowledge already (or you will have to research),
2. Enjoy writing on the subject.

So, go and write your first post. Don't worry about your chosen affiliate product yet. You just need to concentrate on getting some content on your site.

Some things to remember when writing posts are;

1. Make it readable. You want your readers to stick around, so do not post non-stop promotions on your blog. Your aim should be to build a rapport with your readers, and not to simply look like a sales site.
2. Write in your own style. Your new blog is a reflection of your thoughts and expertise. Don't try and pretend to be something you're not. Remember that you are writing about a subject you are passionate about – so just be yourself.
3. Encourage your readers to post comments. Search engines love new and fresh content, and the easiest way to get this is through your blog readers. Ask questions, and write posts that will inspire your readers to post their comments.

When you have a few posts on your blog, you can start to gently promote your affiliate product.

What do I mean by gently?!?!?

Don't make it too obvious that you are trying to make money. Simply provide the odd link within your content and/or in your sidebar to the sales site.

Many bloggers get this wrong. They think that by splashing the link everywhere they are more likely to make sales.

WRONG!

Subtlety is the key here. Remember, it's more important to concentrate on good content that will keep your visitors on your blog for longer – along with encouraging them to come back in the future.

Step 4 – Promote Your Blog For Traffic

This step is a little more advanced. For that reason, I have written a whole eBook on the subject. Don't worry – it's free to you! I could go into detail here, but I wanted to keep this report simple.

To download the book – [CLICK HERE](#)

Summary

1. Register your blog for FREE at Wordpress.com
2. Register for your FREE account at Clickbank.com
3. Start blogging (useful content!). Integrate subtle promotion of affiliate product(s)
4. Promote blog and increase traffic

As mentioned, I cannot guarantee your success. I have used this method to increase my income several times and found it to work well.

I have several blogs online now that provide me with multiple streams of income without costing a single cent. The blogs have varying success, but my best by far is converting into sales well. As I'm writing, my conversion rate works out as almost \$2 per visitor. Remember that the blog is not costing anything, so this is all pure profit.

Just remember that more traffic = more sales. So your job now is to increase traffic to your blog while providing useful content to encourage repeat visits.

This method is not going to make you a millionaire. But, I've been in your position. I know what it's like trying to start an online business with nothing to invest. I would bet money on the fact that you have joined numerous free programs, downloaded hundreds of free eBooks and joined plenty of mailing lists too.

Guess what?

These marketers only wanted your email address so that they can attempt to sell stuff to you in the future. Therefore they will promise you success, \$\$\$\$ and more \$\$\$\$! They don't really care about you. Sorry, but it's the truth and you needed to hear it!

Have you noticed that I haven't charged you for this report. I haven't even asked you for your email address. Even the links to extra information are free. I have nothing to promote except myself and my website. I want you to be successful. I have worked extremely hard to be where I am now – and I want you to do the same.

So, take action. Start today.

Still reading?

WORK!!

Seriously though, you can be successful. You just need to work hard. Make an effort to continuously learn new skills and develop your skills.

One last tip: Use any income you make by using the method outlined above to grow your business. Ultimately you want to run your own website. You will need a hosting account, autoresponder and the rest. But, for now, you don't have the cash to start throwing it around (especially without the experience to know or understand what you are paying for!), so concentrate on developing your free blog and making affiliate sales.

If you ever have any questions, feel free to email me at kevin@cldconnections.co.uk.

Best wishes,

Kevin Davis
