## Introduction

This report is going to be short and sweet and has one simple aim. To educate those interested in internet marketing about the best resources out there.

The internet gets more and more crowded every single day and it's becoming harder and harder to find the information that you are looking for. I spend a good portion of each and every day searching for information online, and so I know just how difficult it can be to find exactly what you are looking for.

When I started my internet marketing career I made a lot of bad choices when it came to purchasing resources for my business. And I do mean a LOT!

It wasn't because I was naïve though, or because I'd been taken for a ride. It was just because there is so much information out there that it's hard to find the right software for you.

You don't need to spend a fortune when starting out online. In fact, I think that it's best to start small and build from there. But making money online is a business just like any other, and it will require some investment. The beauty of this business though, when compared with a traditional bricks and mortar business, is that the investment required here is much lower.

It is important though that you try and get as many of your purchases right first time. I didn't and it cost me. Let me give you a quick example. You might have heard the phrase 'the money is in the list'. Well it is, which is why an autoresponder which collects prospects' email addresses is a pretty essential piece of kit.

Now the autoresponder gold standard is aweber, but as you would expect it comes with a price tag. Not earth shattering but \$19 a month seemed like a lot when I first started out. So guess what? I went with an alternative piece of software which was free. The result? Undelivered emails, angry customers and money left on the table. Oh yes, and when I did eventually get aweber a month later I

<http://www.AutoProfitPackage.com>

**[Discover Exciting Ways To Achieve 24 Hour Auto Pilot Income](http://www.AutoProfitPackage.com)**

was unable to import all my previous addresses from the free service, meaning that I'd just LOST all of the contact I'd built up over the course of the past 4 weeks. Not nice, but then it served me right for not investing in the infrastructure that my business needed. I haven't made the same mistake since.

I have personally used all of the software mentioned in this guide unless I specifically say so. This is the list of software that I use every single day of my internet marketing career. It's the list of resources that I spent months experimenting with through a painful process of trial and error.

If you are looking to build your business from the bottom up, and really deliver the income that you dream of, then don't make the same mistakes that I did and do it right from day one. You will thank me later!

Enjoy this guide, and hopefully you will find it of some use!  
Good luck in your internet marketing career.

To your success!

## **Keyword Research Tools**

Whether you are looking to create a niche website, or looking for the cheapest words on Adwords, Keyword Research Tools are pretty much essential tools for any internet entrepreneur.

I use the DigitalPoint tool which is listed below to measure the demand of a particular niche as one of the first acts of any of my new business ventures. After all, there's not much point in providing an information product about how to skin a cat if the research tools show you that there were only 32 searches last month.

DigitalPoint is free, but if you are looking to turbo charge your keyword research then check out Keyword Elite. My Adwords revenue dropped by about a third when I started using this tool and my Return on Investment skyrocketed.

<http://www.digitalpoint.com/tools/keywords/>

Excellent starting point when conducting keyword research.

<http://www.vretoolbar.com/keywords>

Another very good free keyword research tool. Useful if Digital Point is slow or unresponsive.

<http://www.AutoProfitPackage.com/recommends/keyword>

The ultimate keyword research package. Absolutely essential software for anyone who is serious about making money online.

## **Video Editing Software**

We are living in an increasingly multimedia world and many of the traditional forms of delivery no longer cut it. Sure, PDFs aren't going anywhere but the advent of web 2.0 sites such as YouTube means that if you are really serious about making money online then you want to start making videos. And fast!

I've tried a variety of different applications. Macromedia Captivate is a good option but carries a heavy price tag and is not ideally suited to the Internet Marketing world.

Personally I use Camtasia and am unlikely to try anything else again. There is a reason why it's the software of choice for the pros.

<http://www.techsmith.com/camtasia.asp>

No doubt about it. If you want to produce high end multimedia products then Camtasia is the way to go. I produced my '24 Hours To Auto Pilot Income' tutorial package using this software, and I can highly recommend it.

I have tried using cheaper alternatives and none come close to Camtasia. Yes it's more expensive, but the price tag shows in both the quality of the output and the ease of use. A must purchase if you are serious about making video content

## **Web Browsers**

<http://www.AutoProfitPackage.com/recommends/browser>

If you want fast, secure web browsing then I'd strongly recommend using Mozilla's Firefox browser. There is a very definite reason why most of the leading internet entrepreneurs use Firefox as their browser as choice instead of Microsoft's Internet Explorer.

If you are serious about making money online then download Firefox now. The best part is the Firefox is completely 100% FREE!

## Web Design

<http://www.xsitepro.com/cmd.php?af=558737>

One skill that is very much fundamental to making money online is the ability to create simple web pages. Well, at least until you can afford to outsource that it. Dreamweaver is the heavyweight web design software, and comes packed with a wide variety of features, but it also comes with an extremely high learning curve.

If you are looking for web design software which is easy to use and very accessible then this is probably your best bet. It still has lots of different features but the user face is extremely intuitive which makes it easier for users new to web design to get to grips with the process much quicker than the heavyweight Dreamweaver.

## PDF Creation

<http://www.pdf995.com/>

This is a very user friendly PDF creation software which I personally use. This programme is accessed via the print menu of your word processor. Instead of selecting your printer, you instead select the PDF Creation tool, and then the program will produce a PDF document. Highly recommended.

<http://www.AutoProfitPackage.com/recommends/pdf>

If you just want to make simple PDF documents then go with PDF995. However if you are looking for a way to send your message viral then PDF Viral is an excellent choice.

Viral PDF allows you to create your own PDF documents, and then grant readers permission to rebrand several of the links. The beauty of this system is that if you allow a distributor to insert one of their links within your report then they are far more likely to distribute it.

With a bit of imagination you can come up with an idea where you allow a website to insert one of their links, in return for two of your links being displayed. With a bit of imagination you can use this system to go really viral.

Highly recommended for serious marketers looking to expand their message first.

## **Article Websites**

<http://www.ezinearticles.com>

Without a doubt the best article site out there. This website contains links to thousands of articles on thousands of topics and can be a useful resource when researching a niche topic.

Ezine Articles also has a high page rank, meaning that any articles you submit here have a good chance of showing up in the search engines. This is a particularly good resource if you are looking to develop back links to your site.

On the downside I can take several days to become listed in Ezine Articles, and you are not allowed to post affiliate links, meaning that you must link back to your site before attempting to sell a product.

<http://www.goarticles.com>

Another good article site which also has a high page rank. Articles posted here don't seem to rank as well as those published at Ezine Articles, but the publication process has a much lower lead time.

A big advantage of using Go Articles is that you can post affiliate links, meaning that you don't need to send your article traffic back to your website and then to the publisher's website.

## **Digital Delivery Of Products**

If you are looking to sell information products via ebay, or your own site, then there are many different ways to deliver your product digitally.

There are many different guides out there which will tell you how to deliver your digital content via email templates and rules. I would always strongly advise against this. While this method might save you money in the short term I'd strongly recommend against this. Spend a couple of pounds each month and in doing so you will secure your downloads and make the whole process a lot more simple.

## **Autoresponder**

The money really is in the list, and it really is your most valuable commodity. If there is one thing that you are going to spend money on then make it an autoresponder and get your business off on the right foot from day one.

<http://www.AutoProfitPackage.com/recommends/autoresponder>

There really is no choice here folks. If you are serious about your business then it is aweber all the way. This is one product that is an absolute essential for your online business. Click the link above now and check out the impressive range of features.

## **Web Hosting**

As your business grows you may find that you quickly want to host multiple websites for a variety of purposes. Right now the thought of having just one website may sound daunting, but if you have serious ambitions then eventually you will need to host multiple domains.

There are two ways that you can achieve this. The first is to purchase domain hosting packages as your business expands. This will result in lower initial costs, but your ongoing costs will be sky high by the time you have purchased twenty different hosting packages.

The second option is the smart one. I use a reseller account which basically allows me to host unlimited domains all for one monthly price. I also have NO bandwidth restrictions and NO space limitations. And it enables me to sell bandwidth to my customers too.

<http://www.AutoProfitPackage.com/recommends/webhosting>

Yes, this may result in higher costs initially, but as your business expands you will save big. Click the link above and check out their reseller package. It's what I use and comes very highly recommended indeed.

## **Internet Security**

It's a sad fact of the modern day internet that the more you surf, the more problems you are going to get. Spam, viruses, and registry problems will slow down your productivity.

<http://www.AutoProfitPackage.com/recommends/spyware>

<http://www.AutoProfitPackage.com/recommends/registry>

The two products above come highly recommended for solving your spyware and corrupted registry problems. Just think how much time you will save when your PC isn't crashing every ten minutes. Click the links above now and take advantage of a FREE scan.

## **Networking**

Just listening to established professionals can be a very productive experience.

<http://www.warriorforum.com>

If you are just starting out I strongly recommend that you visit the forum above and just read some of the threads and pay attention to the movers and shakers. I learned an awful lot just from listening to these fantastically creative business people and you can too.

## **Merchant Tools**

At some point you are going to want to accept payments of your own. Hopefully sooner rather than later.

<http://www.AutoProfitPackage.com/recommends/paypal>

Click the link above to register with Paypal if you haven't already done so. It really is the easiest way to start accepting payments right away.

<http://www.AutoProfitPackage.com/recommends/ebay>

eBay is an unbelievable traffic generation tool when used the right way. If you're not already a member then click the link above and get registered straight away.

<http://www.AutoProfitPackage.com>

If you want to discover how you can leverage the eBay system to generate 24 hour auto income streams then visit my site by clicking the link above. For people seriously interested in making multiple automatic income streams only.

## **Viral Traffic**

Getting traffic is one of the hardest parts about starting an online business. You can have the best product in the world, but unless you have targeted traffic then it's not going to sell.

<http://www.AutoProfitPackage.com/recommends/viraltraffic>

I find the Instant Buzz system for viral traffic to be unbeatable. Check it out for yourself by clicking the link above. Basically it works like this. You download a small toolbar which sites at the top of your browser and then displays adverts written by other users. While you are watching other people's adverts someone else is watching yours!

This means that you get to blast your advert out there, and all that you need to do is surf the net to get more exposure. And the best part of all is it is 100% FREE!

<http://www.AutoProfitPackage.com>

**[Discover Exciting Ways To Achieve 24 Hour Auto Pilot Income](#)**

## **Pay Per Click Advertising**

Pay Per Click advertising is one of the fastest ways to get instant targeted traffic. It can be expensive, but if you get your campaign just right then it can also be extremely lucrative too.

<http://www.AutoProfitPackage.com/recommends/ppc>

Click the link above to register for free with Google Adwords. This is the Pay Per Click network that I use to promote my sites.

One word of caution though: You can make your fortune on Google Adwords, but you can also lose it. If you are serious about making money using this method then you need to do your research first. And lots of it too.

<http://www.AutoProfitPackage.com/recommends/adwords>

Beating Adwords is an excellent guide to the PPC game. I would strongly recommend that you read this book from cover to cover before attempting to crack the Adwords code. But if you do crack the code it can be EXTREMELY lucrative indeed.

## **Miscellaneous Resources**

If you want to turbo charge your money making efforts even further then the Super Affiliate Handbook is an excellent place to start.

<http://www.AutoProfitPackage.com/recommends/superaffiliate>

Learn how the author earned \$436,797 using some extremely clever techniques. Perfect for those wanting to experiment with different ways of making money online.
